Ruthin Repair Café 'Fixpert' Profile

Ruthin Repair Café is fortunate to have many talented volunteers who turn up each month to repair items that are broken or to give advice. This month we are featuring the skills of Pete Darby who is our software support 'fixpert'.

Pete can help with mobile phones, laptops and printers. He doesn't do physical repairs but, for example, if your printer has stopped communicating with your laptop or phone he most definitely can help.

He also gives advice on;

- Repairs.
- Disposal of laptops and phones (how to get rid of personal data etc.)
- Speeding up computers.
- Security advice.
- Set up help with new devices (this may be useful if you have a device as a Christmas present).

Here are some of his easy to do security tips;

- Run all updates.
- Use a password manager.
- Use sites that offer 2 factor authentication.

And some advice for speeding up your computer

- Run all updates.
- Uninstall redundant apps – only run what you want and need to run.
